

Extrusions

At A Glance

We stock a wide variety of plastic, aluminum, stainless steel and solid brass extrusions

Products

Plastic Extrusions:

We work with the most advanced color labs and production facilities in the world and can duplicate or create plastic extrusions in almost any shape, color, tint, tone, transparency or translucency. For custom plastic extrusions, minimum production runs and color matching fees will apply.

We also offer plastic extrusions in a broad range of available plastics that are not listed.

Material	Properties
ABS <i>(Acrylonitrile Butadiene Styrene)</i>	Rigid material. Good scuff resistance. Good for low temperature performance. Good for color matching. Good chemical resistance.
Acrylic	Rigid, clear material with high clarity. Good weather resistance. Can be modified for extra strength.
Butyrate <i>(Cellulose Acetate Butyrate)</i>	Semi-rigid, clear material with excellent clarity and high gloss. Good for color matching. Can be modified for good weatherability.
Flexible PVC <i>(Polyvinyl Chloride)</i>	Flexible material. Good abrasion resistance. Self healing with good weatherability. Good for color matching. Available in finishes from matte to high gloss.
Low Density Polyethylene <i>(LLDPE, LDPE)</i>	Flexible material. Tough. Good for low temperature performance. Good for color matching. Semi-gloss finish.
PETG <i>(Polyethylene Terephthalate Glycol)</i>	Rigid, clear material with high clarity. Good impact strength.
Styrene (HIPS)	Rigid, clear material. Cost effective. Good for color matching. Can be foamed.
Rigid PVC <i>(Polyvinyl Chloride)</i>	Rigid material. Available in clear or colors. High impact strength. Good abrasion and chemical resistance. Self extinguishing.
Polypropylene	Semi-rigid material. High strength. Good for low temperature performance. Good for color matching. Available in FDA approved grades. Great for use in hinges.
TPE (Thermo Plastic Elastomers)	Very flexible material. Available only in colors. Good performance in a wide range of temperatures.
Polycarbonate	Rigid, clear material with very high clarity. Lightweight with excellent strength. Good for color matching.
Polyurethane	Flexible to semi-rigid material. Available in clear and colors. Good abrasion and chemical resistance. Can be foamed.
Nylon	Rigid material. Excellent wear and abrasion resistance. Good performance in a wide range of temperatures.
Styrolux <i>(Styrene Butadiene Block Copolymers)</i>	Semi-rigid, clear material with excellent clarity and high gloss. Cost effective. Good impact resistance.

Aluminum Extrusions:

We offer aluminum extrusions in a wide variety of stocked and custom anodized and powder coated finishes in almost any color along with wood grain, marble and faux finishes.

Material	Properties
Aluminum	6063 T5 provides good extrudability with a high quality finish and offers some corrosion resistant properties.
Stainless Steel	430 grade is magnetic. Added chromium provides corrosion resistant properties.

In House Engineering & Custom Tool Design

With our in house tooling capabilities and exceptional network of affiliated production partners, we have the largest library of profile tooling available in the industry, enabling us to provide you with profile extrusions without the high cost and delay of having to fabricate new tooling.

Our in house engineers and affiliated production partners can assist you with the design and production of cost effective custom profile extrusions up to 12" in width or larger, manufactured to the most exacting tolerances in your choice of materials.

Color/Finish Matching

Depending on the properties of the material chosen, we can custom color match all of the plastic and aluminum extrusions that we offer by your simply sending us a sample color swatch, chip or item to be matched.

Cutting

We offer a variety of cutting options for our plastic and semi-rigid and rigid aluminum extrusions.

Standard Cut:

Standard Cuts are utilized to reduce freight costs by cutting extrusions to specific sized lengths that can be shipped via UPS or FedEx.

- Low tolerance Standard Cuts are cut to specified sized lengths of 6'x6', 8'x4' or 4'x4'x4' with a (+/- 1") tolerance for UPS or FedEx Ground shipments
- No more than 2 cuts per length
- Costs vary by quantity and material
- Restocking fees apply to all returned items with the exception of errors on our part

Non-Standard Cut:

Non-Standard Cuts are required when cutting extrusions to specific sized lengths that do not conform to the cut sizes listed in Standard Cuts (For example, a 12' length may be cut to 79" if desired with the customer receiving the balance of the cut length).

- Low tolerance Non-Standard Cuts are cut to specific sized lengths with a (+/- 1") tolerance
- No more than 1 cut per length
- Cuts must be made in full inch increments
- Costs vary by quantity and material
- Cut lengths may or may not meet UPS or FedEx shipping requirements
- No returns allowed with the exception of errors on our part

High Tolerance Secondary Cut

High Tolerance Secondary Cuts are suited for immediate jobsite use when cutting extrusions to specific sized lengths & tighter tolerances.

(For example, a 12' length may be cut to 17-1/4", 69-5/16" & 56-1/8" as required).

- High Tolerance Secondary Cuts are cut to specific sized lengths with a specified (+/- 1/32" to 1/8") tolerance
- Cuts can be made in any quantity per length to different specified sizes
- Costs and tolerances will vary by product, material and quantity of cuts
- No returns allowed with the exception of errors on our part

In Line Cut

In Line Cuts are utilized for extrusions that are custom extruded with the highest tolerances to your specified lengths, and are most cost effective for those requiring minimum production quantities of 5000' or more.

- Providing that the minimum production quantity is met, In Line Cut extrusions can be extruded to any length with a plus side tolerance at no additional cost
- Costs and tolerances will vary by profile and material, and will need to be quoted on a per order basis
- No returns allowed with the exception of errors on our part

Secondary Application of Tape

Whereby many stocked plastic extrusions are available with rubber based, foam or adhesive tape, if required, we can apply adhesive tape either supplied by the customer or us to small quantities of selected extrusions not manufactured with adhesive tape.

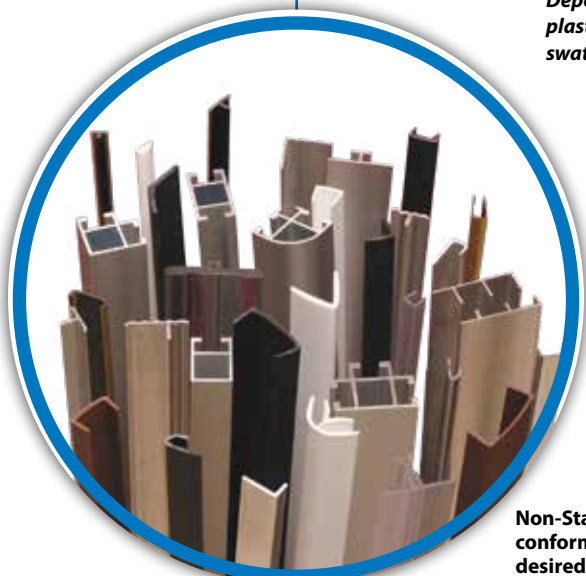

- Costs will vary by product, material and quantity, and will need to be quoted on a per order basis
- No returns allowed with the exception of errors on our part

Bagging, Pack Out & Kitting

We can bag, pack out and kit specific items to your requirements in poly bags or boxes together with your extrusion order (Which may include your literature, instructions or other customer provided or purchased products). Costs will vary and will need to be quoted on a per order basis.

Drop Shipping

We can drop ship on your behalf to single or multiple locations either with or without our name or address (Blind Shipping) to meet your requirements. Quoted on a per order basis.

HAND HELD AIR HAMMERS

- OVER 1000 BLOWS PER MINUTE.
- NO SWINGING.
- Can be used anywhere the smallest hand can reach. Replaces wide variety of cumbersome hammers and mallets. No skilled personnel.
- CONTROL. A single hammer blow or excess of 1000 blows per minute. Adjustable from slightest hammer tap to heavy impact blows.
- VERSATILE. Easily interchangeable hammer tips of super soft hard plastic, steel and aluminum.
- PALM SIZE-LIGHTWEIGHT-SAFE.

Tee Moulding Tools

EDGE TRIMMER 101

THE QUALITY HSS BLADE (3mm thick, 18% tungsten) has two cutting edges and, therefore, operates both forwards and backwards and effortlessly cuts off all projecting lippings neatly and completely flush-when the additional jaws are used with a chamfer of 30° or 45°. The chamfer is adjustable according to the spacing between the additional jaws. Supplied with a built-in blade and additional jaws 45° mounted, a pair of additional jaws 30° and on fence for plane parallel cutting--the latter for PVC and veneer edges.

With fence for veneer edge & PVC lippings

With additional jaws 45° or 30° for plastic lippings

101-TRIMMER
101XTRA-BLADE

FLUSH TRIMMER

This all metal hand tool features a precise high carbon steel cutting blade that trims excess material from the edge of the tee moulding face, creating a smooth flush table or counter surface. The unique circular blade can be rotated to expose a new sharp cutting surface. This feature eliminates the need for frequent sharpening. Heavy cast aluminum housing with ball bearing roller guides facilitates easy operation.

Notching Tools

The most important "quarter inch" in mitering is that small portion of the barb which is removed by the notching tool. This special "V" cut enables the moulding to negotiate small radii and sharp corners for a clean, smooth installation.

Part#	Description	Punch Thickness
P900R	Vinyl Tee Moulding Notcher - cuts 1/4" radius	0.156"
1870A	Replacement Blade	-
P900A	Aluminum & Vinyl Notcher with 1/16" opening	0.050"
1840A	Replacement Blade (A-Notch)	-
P900V	Channel and Angle Notcher with 3/32" opening	0.090"
848A	Replacement Blade	-

3rd Hand HD

The 3rd Hand HD is the help you have been looking for. If you ever wished you had an extra hand, look no further. It is rugged, built to last a lifetime and it's never late for work! Brace, jack or support whatever you need.

- 360° articulating foot Pump jack for precision height adjustment
- Telescoping pole, 5' to 12' with ball detents for positive locking
- Great for hanging cabinets, drywall & crown moulding

Part#	Description
3-H-HAND-HD-5	3rd Hand single pack
3-H-2PK-3-HAND-5	3rd Hand twin pack

1 MANUAL EDGE BANDER

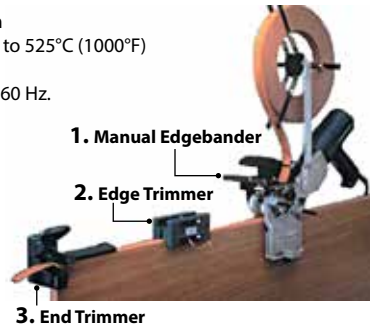

For banding pre-glued edges on PVC, polyester, melamine and veneer. It can band both straight and shaped work pieces. Through special design of an adjustable clamp high precision work and reliability are ensured. Guillotine knife for end trimming and roll-holder included as standard equipment.

SPECIFICATIONS:

- Double Insulation
- Max. Banding Width - 50mm
- Temperature - 300°C (570°F) to 525°C (1000°F)
- Air Delivery - 400/min.
- Input Power - 115/230 V, 50-60 Hz.
- Weight - 2,7 Kgs
- Maximum Material Thickness- 1mm

EBS-980
(Includes Edge Bander,
Edge Trimmer & End Trimmer)

EBS-980-XBLADE
(Replacement Blade)

2 EDGE TRIMMER

Double edge trimmer. Cuts both sides simultaneously, finishing operations. For edges up to 40mm. For larger edges it can be used as two independent edge trimmers. Top quality long life blades which are easy to replace once worn.

EBS-930
EBS-930-RB
(Replacement Blade)

3 END TRIMMER

Manual end trimmer. It allows a perfect, clean and high quality cut on all the corners of the board. No other finishing operations are needed. Equipped with double sided blades.

Trims up to
1mm each side.
Max Edge Width: 2.4"

EBS-210
EBS-210-RB
(Replacement Blade)

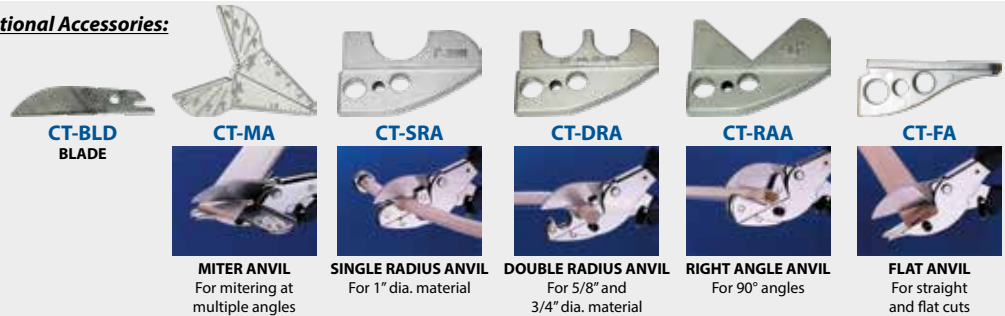

Multipurpose Cutter

GT-7000

- Heavy duty forged steel blade for extra tough materials
- Ergonomic handle for comfortable use

Optional Accessories:

CT-BLD
BLADE

CT-MA

CT-SRA

CT-DRA

CT-RAA

CT-FA

MITER ANVIL
For mitering at multiple angles

SINGLE RADIUS ANVIL
For 1" dia. material

DOUBLE RADIUS ANVIL
For 5/8" and 3/4" dia. material

RIGHT ANGLE ANVIL
For 90° angles

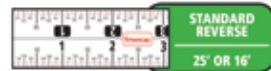

FLAT ANVIL
For straight and flat cuts

Pro Carpenter Tape Measure

PSSR

- 16 ft. length
- Built-in pencil sharpener
- Erasable note pad
- Belt clip
- Locks in place from the top or bottom
- Numbers can be read from both left and right hands

CL46 Clipper

DELIVERS QUICK CLEAN CUTS

- Plastic Tubing - Rubber - Weather Stripping**
- Rope - Twine - Leather - Plants/Shrubs - Crafts**
- Wood Trim - Carpeting - Linoleum - Auto Trim**
- Auto Belts & Hoses - Nylon and much more!**

- Replacement stainless steel blades (previously carbon)
- New convenient blade storage in the handle blade tray slips into handle for storage of extra blades.
- Now available in 2 sizes: 2-1/2" & 3-7/8".
- New replacement kit contains 3 stainless steel blades and 1 anvil: complete with storage tray.

FOR AUTOMATIC EDGEBOARDERS

Eco Style™ ABS Edgeband

AVAILABLE WIDTH SIZES: 15/16" & 1-5/16"
THICKNESS: .018, .020 - 600 FT. COILS, 3MM - 300 FT. COILS

ABS is chlorine - free both in its manufacture and in the final product. Unlike PVC, ABS may be incinerated with general waste. Additionally, this thermoplastic material is impact and temperature resistant, lighter in weight and highly heat resistant. Material is produced in our North American facility according to ISO 14001 environmental standards.

Visions™ Glass Like

AVAILABLE WIDTH SIZES: 23MM & 45MM
THICKNESS: 2MM - 328 FT. COILS

Glass is synonymous with clarity, light and openness, with visions™ edgeband achieves the unique appearance of real glass using lightweight, robust polymer. We create the illusion of depth by applying a decorative print to the underside of transparent Poly (Methyl Methacrylate PMMA) material. When this material is radiused or beveled, it diffuses light in the same way as real glass. By combining vision edgeband with matching boards or laminates, you can achieve the appearance of a real sheet of glass.

Part#	Size	Color	Thickness	Coil Size

Magic™ Metallic

AVAILABLE WIDTH SIZES: 22MM, 28MM & 43MM
THICKNESS: 1.5MM - 492 FT. COILS

Using various combination of genuine aluminum edgeband and polymers, Magic™ Metallic edgeband achieves the look and feel of metal banding without its processing drawbacks. The magic collection, offered in aluminum and stainless steel finishes, includes metallic surface, translucent and magic creativo™, a twin level solid or printed surface with metallic overlay.

Material: PVC w/Segmented Metal Core / Aluminum Core • Embossed Vinyl • Black or White

- Used for classic car, bus, snowmobile, air and other industries
- Made with a tough PVC cover with a metal segmented core / aluminum core, our channel provides an aesthetic and protective edge trim
- Easy to install with a strong clip-on grip
- Does not need tacking, gluing or riveting
- Used with metal, plastic, fiberglass, glass and wood to cover sharp edges and flanges.
- Labor saving product that can eliminate the need to deburr or remove sharp edge and painting.

Material: MDS Modified Nylon • Lengths: 100 Ft. Coils • Color: Dark Gray

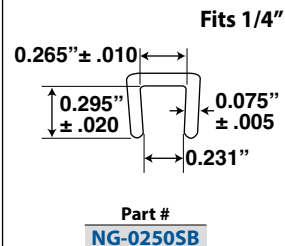

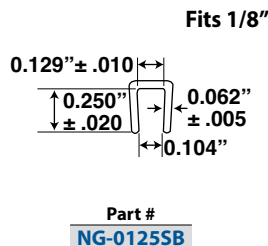

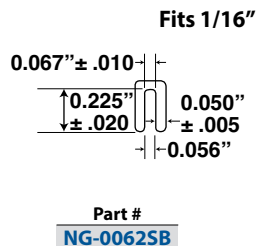

unless otherwise noted

By adding Molybdenum Disulphide to Nylon 6, our profiles feature advanced mechanical and thermal properties over plain nylon including:

- **SUPERIOR HEAT RESISTANCE**...resist distortion to 300° with a maximum continuous use temperature of 250°
- **SUPERIOR WEAR RESISTANCE AND SURFACE LUBRICITY**...in many cases outwears metal and are not vulnerable to fretting & galvanic corrosion
- **SUPERIOR DIMENSIONAL STABILITY, STRENGTH AND RIGIDITY**...maintain better fit while having greater tensile and compression strength in use

We can also supply custom orders without holes - minimums apply - please inquire.

Reverse cove moulding is used to cover up seams or joints wherever two perpendicular planes meet. The sink top to its backsplash or the ceiling to a wall surface represent typical applications for which our reverse cove moulding was designed. The leg of the profile seals tightly against both surfaces to lend a cleanly trimmed appearance to the finished product.

SPECIFICATIONS:

1/4" gauge Vinyl Wallbase conforms to all requirements of Federal Specification #SS-W-40A Type 2 Vinyl Plastic: .080" Thickness. Class 1 Vinyl Chloride.

FLAME SPREAD AND SMOKE DEVELOPMENT RESULTS:

Wallbase has a Flame Spread Index of 20 and Smoke Development Value of 290. Test results, calculated in accordance with ASTM-E84-912. The National Fire Protection Association Life Safety Code 101, Section 6-5.3, "Interior Wall and Ceiling Finish Classification", classifies materials with respect to Flame Spread and Smoke Development. When tested in accordance with NFPA 255, Vinyl Wallbase gained a Class A rating.
