## Door Design Systems

### Backpainted Glass

Backpainted glass manufactured by Element® Designs is free of imperfections, completely opaque and includes an engineered backer coating for added durability and opacity. All backpainted glass is custom manufactured to size with a variety of edgework options to accommodate any application. This is an ideal product for a variety of applications such as wall panels, partitions, backsplashes, table tops, countertops and even trade show flooring.

### CRISTALLO Solid Glass Doors

### PARAPAN® High Gloss Solid Surface

PARAPAN® is a high quality, solid surface acrylic material, which is cell cast between sheets of heavy glass that yields a perfect flat mirror finish on both front and back surfaces. The numerous color options and edge detail possibilities make it an ideal choice for the most discriminating residential and commercial interiors. The solid surface composition is UV and fade resistant and will retain its vibrant color indefinitely. Any minor surface damage can be easily removed through polishing and larger scratches can be sanded away which makes PARAPAN® a durable high gloss cabinet from solution for any application.

### Etched Glass

- Chemically etched glass with evenly "etched" surface
- Custom etched patterns or images using customer provided artwork and designs

**Let Us Be Your Fabricator**  
**We Do It All For You**

## Door Design Systems

### Magnetic Markerboards

Magnetic markerboards are custom manufactured backpainted glass panels with an integrated magnetic backer. It is extremely durable, easy to clean and stain resistant. Magnetic markerboards can be manufactured with standard, non-standard or custom backpainted glass colors.

### Cabinet Doors with Integrated AVENTOS Lift Systems

### Sliding Door Systems

**DISCONTINUED**

## Crystal Glass

### Polymer Back-Painted Glass, 3/4" Thick Cabinet Doors

#### Glass Surface

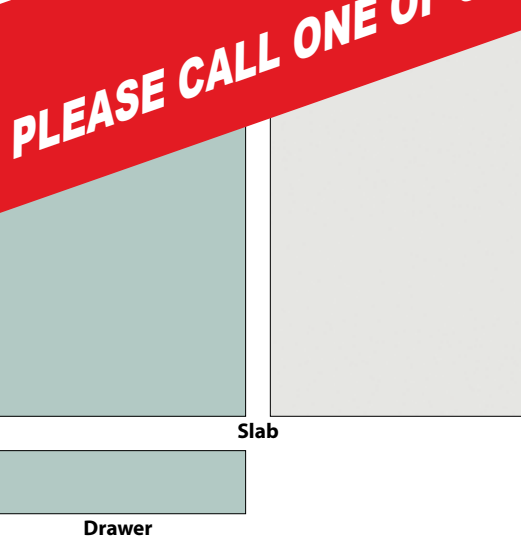

**Crystal Glass** gives all the beauty of back-painted glass with none of the drawbacks. It can be used with any kitchen tools, and doesn't require an aluminum frame. Our components feature matching edgebanding, which is laminated onto super-refined MDF using specially formulated PUR glue in a continuous process. This ensures optical grade reflection quality and perfectly balanced panel weight.

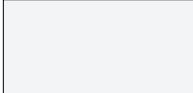

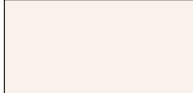

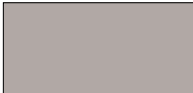

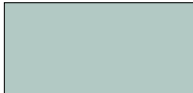

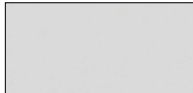

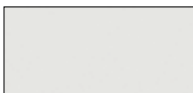

**Edgeband Specifications:** **Crystal Glass** components are edgebanded with a moisture-resistant seamless joint. It has a 2.0 mm edgeband thickness, which is invisible from the front. The edgebanding is a glass laminate sheet with an invisible functional layer allowing the edgeband to be removed without damaging the glass.

#### Polymer Back-Paint

**DISCONTINUED**

#### Available Finishes:

			
Bianco (High Gloss or Matte)	Perla (High Gloss or Matte)	Magnolia (High Gloss or Matte)	Fumo (High Gloss or Matte)
			
Sabbia (High Gloss or Matte)	Menta (High Gloss or Matte)	Nebbia (High Gloss or Matte)	Piano (High Gloss only)
			
Zucchero (High Gloss only)	Legno Sbiancato (High Gloss only)	Marmo Bianco (High Gloss only)	Marmo Nero (High Gloss only)
			
Mirror (High Gloss only)			

A protective peel coat is applied to the top of the frosted glass, matte surface & the edgebanded sides. Remove promptly after installing and prior to mounting hardware.

10x more break resistant

Zero-joint technology

Surface and edgeband perfectly matched

Heat and humidity resistant

Warp resistant

Marking board with no ghosting

Chalk easily writes then wipes

## Crystal Slim

### Polymer Back-painted Glass, 5/32" Thick Panels

#### Backsplash

With **Crystal Slim**, wall areas in new buildings and renovation projects can be easily updated and modernized with a fresh back-painted glass look. Renovation projects can be 2x as fast. The panels are simply glued to the wall surface resulting in almost invisible joints. Unlike real glass, **Crystal Slim** does not need to be drilled and routed on the job site. **Crystal Slim** is suitable for applications including kitchen or bath backsplashes.

**Applications:** **Crystal Slim** can be used as a backsplash behind a gas cooktop or as a wall panel or a shower wall. **Crystal Slim** is a Class 1 fire retardant material directly behind the cooktop.

**Peel Coat:** A protective peel coat is applied to the top of the glass surface. Do not expose peel coat to direct sunlight before removal. Remove promptly after installing **Crystal Slim**. To remove peel coat, use rubber fingertips or our peel coat removal tool.

### Polymer Back-painted Glass, 5/32" Thick Panels

## Terra

Soft, Textured High Pressure Laminate, 13/16" Thick Cabinet Doors

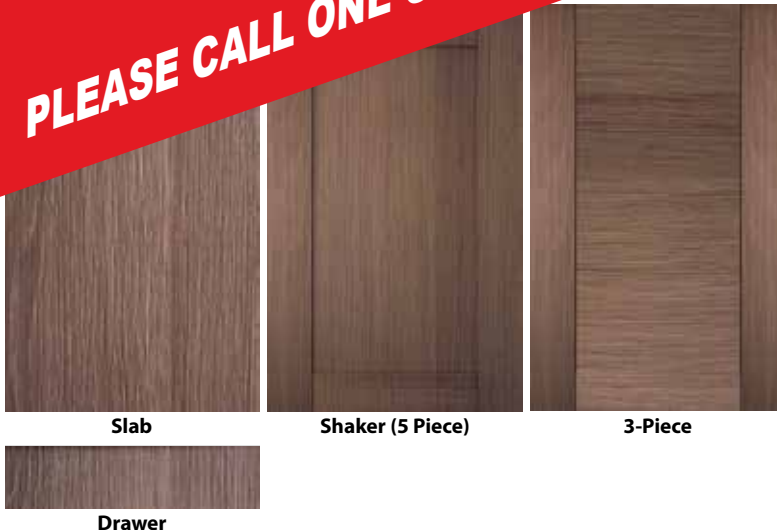

### Natural Surface

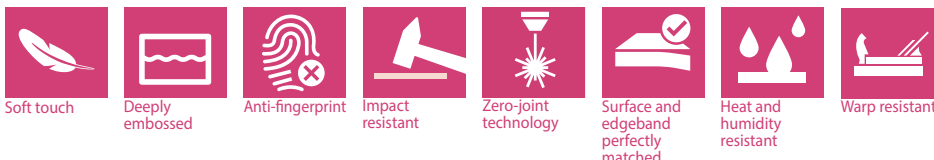

**Terra** is an extremely durable, deeply textured, surface made from high quality laminate. Our components feature double-side wood grain with matched edgebanding on particleboard both top and bottom laminate sheets. Terra is available in MDF or solid wood. **Edgeband Specifications:** All components feature a 1/4" edgeband that is extremely heat and moisture resistant. The result is a seamless, durable finish. **Soft, Textured High Pressure Laminate**

**DISCONTINUED**  
PLEASE CALL ONE OF OUR SALES ASSOCIATES FOR OTHER OPTIONS

### Available Finishes:

There is no protective peel coat on Terra products. PSA sheet for refacing is available with pre-applied adhesive.

## Integrated Handles

Anodized Aluminum - Multiple Colors, End Caps - Aluminum, Color Matched

### Recessed profile / J channel

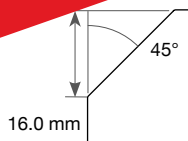

**Integrated handles** are available in two unique styles that each provide a soft touch and streamlined aesthetic.

### Hidden Recessed Handle

2 mm

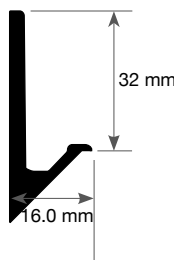

The 2 mm integrated handle is almost invisible and provides an exceptional look.

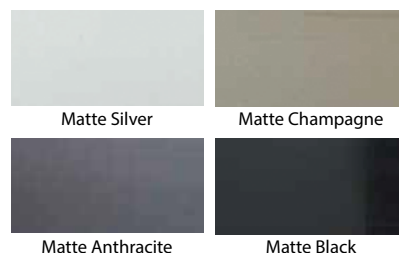

### Complementary J Channel

32 mm

The 32 mm integrated handle features a visible channel in multiple finishes with metallic end caps.

### Available Finishes:

### Size Parameters

**Minimum Length** 12 in (304.8mm)  
**Maximum Length** 109 in (2768.6mm)

*These Integrated Handles work with our Brilliant, Crystal or Terra Lines.*

Phone: 1-800-631-8375 • Fax: 1-800-888-3315

Optional Components

Custom Cut-to-Size Options

Doors and Drawer Fronts

Components are 3/4 in. thick and are edgebanded on all four sides.

End Panels

We offer door and drawer panel matching base, tall, and wall applied end panels edgebanded on all four sides. End panels are rectangle and are designed to capture the toe kick.

Filler Panels

Filler panels come as 3/4 in. thick components with your choice of either the two short sides or two long sides edgebanded. Note that the minimum width must be at least 3 in. for the long sides to be edgebanded, and the minimum width must be at least 3 in. for the short sides to be edgebanded. It is therefore recommended to order filler panels in 3 in. widths and then rip them down to size during installation.

Raw Boards and Edgeband

We have laminated boards in 3/4 in. thickness (raw edge) available, along with edgeband coils for all of our products.

1/4 in. Panels

We offer select surfaces in 1/4 in. thickness.

Backsplash

Crystal Slim

With Crystal Slim, wall and backsplash can be easily updated and modernized. Installation work can be 2x as fast. The panels have very few, almost invisible joints. Unlike other systems, they can be installed flexibly on site. The system design of backsplash allows for a wide range of applications, including kitchen or bath backsplash.
